**whittaker-portfolio.vercel.app**

Ho Chi Minh City

## Education

**Web developer**

**2019 - 2023**

**HCM City University of Transport**

- - - - Major: web developer, front-end Developer

## Skills

**Backend:** Node.js, Express.js, NestJS, ExpressJS,...

**Database:** PostgreSQL, MySQL, MongoDB, ORM,...

**Frontend:** ReactJS, Next.js, TypeScript, JavaScript, React native,...

**Tools:** Git, Docker, AWS, CI/CD,...

**Languages:**

- **Vietnamese**: Native
- **English**: Able to communicate effectively in speaking, listening, and written communication.

## Objective

Full Stack Developer with nearly 3 years of experience specializing in Node.js, TypeScript, and modern JavaScript frameworks. Passionate about building scalable, maintainable applications and solving real-world problems. Seeking to contribute my technical expertise while continuously expanding my knowledge in backend architecture, cloud technologies, and system design, with the long-term goal of becoming a Senior Full Stack Engineer and technical leader.

## Work experience

**Software Engineer** **2023 - 2026**

NUS Technology

- Full-stack Developer with 10+ production projects across diverse industries (E-commerce, Education, CMS, Food & Beverage, Sports, Booking), working with Node.js/Express, MongoDB/PostgreSQL, React, and React Native in teams of 3–6.
- Built responsive web apps (React, Next.js, TailwindCSS) and cross-platform mobile apps (React Native) with reusable components, navigation, deep linking, and platform-specific UI/UX for iOS and Android.
- Optimized performance: reduced response time from 2s to 300ms via Redis caching; implemented BullMQ for async processing (email/notifications) handling up to 10K emails/day; improved API consumption, image loading, and state management for smoother, faster experiences.
- Integrated Stripe payment processing end-to-end (webhooks, subscriptions/billing) with idempotency and retry handling for reliable transaction processing.
- Built CI/CD pipelines (GitHub Actions) for automated testing, code quality checks, and deployment, significantly cutting manual review time; wrote unit/integration tests (Jest) for core APIs, improving code reliability.
- Deployed and managed containerized services (Docker) on Linux cloud infrastructure, configuring Nginx reverse proxy, SSL, and secure webhook integrations for real-time payment/order events.
- Leveraged AI development tools (Claude, Cursor, Codex, and Windsurf) to accelerate coding, debugging, refactoring, code review, and solution design, improving overall development productivity.

## Certifications

**12/2021** Javascript Couse - F8 fullstack

**3/2020** ReactJS - F8 Fullstack

**4/2022** React ,React-Router - Codecademy

**5/2023** Toeic 640

**5/2020** UI/UX for beginers- Codecademy

**4/2026** Claude Code in Action
